Danas - Biznis

Doseg: 31,855

Zoran Drobnjak, vršilac dužnosti direktora Javnog preduzeća "Putevi Srbije Izgradnja Koridora 11 zamajac za

ma Javnog preduzeća "Putevi Srbije" ta saobraćajnica? žavnih puteva iz Projekta rehabilitacivija - Mali Zvornik, Mali Zvornik - Banja Koviljača, Zavlaka - Pričevići, Krst - Zavlaka, Lazarevac - Arandelovac, Krćevac - Arandelovac, Raška - Jarinje, uskoro završavamo Rudnik -Topola. Očekujemo završetak izrade projekata za rehabilitaciju 200 kilometara puteva što nam omogućava pokretanje javnih nabovki za izvođenje radova, ugovaranje i početak radova u aprila, maja naredne godine, na deonicama: Vlasotince - Svođe, Zaječar 5 - Knjaževac 1 (Trgovište), Granica HR/RS (Batrovci) - Kuzmin 1 (autoput) Kladovo - Brza Palanka, Irig - Ruma 1 (autoput), Kneževići - Bela Zemlja Užice 3, Topola 2 - Kragujevac 5, Prijepolje -Sjenica 3 (Medare) Počela je sa radom naplata satarine na naplatnoj stanici Preševo, na deonici auto-puta, od mesta Levosoje do granice sa Makedonijom, u dužini od 22 kilometra. Naŝa vizija je da budemo ugledno i uspeŝno preduzeće za upravljanje i razvoj državnih puteva u składu sa očekivanjima svih zaintereso vanih strana. Obezbediti korisnicima državnih puteva raspoložive, bezbedne i komforne uslove putovanja, stvoriti društvu u celini infrastrukturnu bazu za razvoj, partnerima obezbediti dugoročne poslove uz mogućnost razvoja, voditi računa o zaštiti životne sredine kaže u razgovoru za Danas Zoran Drobnjak,

"Putevi Srbije". U kakvom su stanju putevi koji su u nadležnosti ovog javnog preduzeća i da li je u pro-teklom periodu nešto urađeno na unapredenju saobraćajne infrastrukture?

 Imajući u vidu stanje puteva u našoj zemlji, nameće se zaključak da je ulaganje u postojeću potnu mrežu apsolutno neophodno kako bi se trajno i neprekudno obezbedilo očuvanje ranije loženog kapitala, a troškovi korisnika sveli na prihvatljiv nivo. Posebno treba naglasiti da je za edovno održavanje putne mreže u Srbiji, što je u našoj nadležnosti, potrebno godišnje oko 25 milijardi dinara. Održavanje, rehabilitacija, i rekonstrukcija <mark>putne mreže</mark> zahteva veoma velika ulaganja sredstava, što je jedino moguće uz podršku stabilnih izvora finansiranja. Šve je to

deo unapredenja saobraćajne infrastrukture. Rekonstrukcija je radena na putu koji vodi od Topole, preko Rudnika, do Gornjeg Milanovca i Čačka. Možete li nam reći nešto

16.01.2017

celokupan privredni i društveni <mark>razvoj</mark>

- Radovi na pomenutoj deonici su deo Pro-Rehabilitovali smo 124 kilometra dr. jekta rehabilitacije puteva i unapredenja bezbednosti saobraćaja i obuhvatili su urgentno pateva i mapredenja oznovenosti u održavanje i saraziju oštećenja na državnom putu II A reda broj 152, Topola 1 - Bućin grob, deonica Topola 1 - Bućin grob, u ukupnoj dužiri od 27.280 kilometara. Sta su planovi "Puteva Srbije" u narednom periodu? Realizacija planiranih aktivnosti u 2017. godini na Projektu rehabilitacije puteva i una-

predenja bezbednosti saobraćaja; proširenje 17 stojećih naplatnih stanica, odnosne obezbedenje zasebnih kanala za elektronsku naplatu tarine na naplatnim stanicama gde to do sada nije bilo mogaće; završetak izgradnje nove tne stanice Vrčin, gde će se povećati broj saobraćajnih traka sa postojećih 15 na 23, a samim tim biće povećan i broj kanala za elektronsku naplatu putarine to jest naplatu putarine bez zaustavljanja. U planu je i nastavak izgradnje Obilaznice oko Beograda i to radovima na 19,5 kilometara dugoj deonici od Ostružnićkog mosta do Bubani Potoka, zatim izgradnja auto-puta Surčin-Obrenovac. Podsetiću da su ovori potpisani na Petom samitu šefova vlada Kine i 16 zemalja centralne i istočne Evrope, održanom u Rigi, a potpisnici su potpredednica Vlade Srbije i ministarka građevina stva, saobraćaja i infrastrukture Zorana Miha wik, direktor Javnog preduzeća "Putevi Srbie" i kineska kompanija "Pauer konstrakšn

korporejšn of Čajna". Nakon izgradnje Koridom 11 "Putevi Srbije" će preuzeti održavanje tog auto-puta. vršilac dužnosti direktora Javnog preduzeća Kakve će konkretne dužnosti imate zaposleni u "Putevima Srbije" i da li preduzeće

spremno dočekuje te zadatke? Konkretne dužnosti sadržane su u okviru redovnog održavanja puteva i objekata i podrazumevaju letnje i zimsko održavanje puteva kao i održavanje elektro-instalacija i wetljenja. Apsolutno spremno dočekujemo nove radne zadatke, to su uobičajeni poslovi koje naši inženjeri obavljaju desetina-

Da li će posle izgradnje Koridora 11 saobraćajna infrastruktura u Srbiji biti unapredena i u kom pogledu?

 Izgradnjom auto-puta saobraćajna infrastruktura u Srbiji biće svakako unapređena kako u pogledu nivoa bezbednosti saobraćaja, tako i skraćenja vremena putovanja, brže i udobDanas - Biznis Država: Srbija

Za redovno održavanje

putne mreže u Srbiji potrebno je obezbediti oko 25 milijardi dinara godišnje

nije vodnje. Primera radi, građani koji su na potezu od Čačka do Ljiga putovali Ibarskom gistralom, otvaranjem nove deonice Ljig -Preljina, dobili su bezbedniju, lakšu i kraću alternativa - Koridor 11. Deonica Ljig - Preljina na Koridoru II je bezbednija od Ibarske magistrale, 17 kilometara kraća i omogućava korisnicima puta skraćenje vremena putovanja za oko pola sata, umesto dosadašnjih oko sat vre-

Na izgradnji Koridora II učestvuju i domaca preduzeca. Da li je to dobar način za sticanje referenci i dobijanje drugih poslova? Kada ste deo jednog tako velikog i značaj-

nog projekta, kao što je izgradnja Koridora 11. to jeste pravi i najbolji način za sticanje referenci i dobijanje novih poslova. Da li će se izgradnjom Koridora 11 saobraćajna infrastruktura Srbije približiti

kvalitetu koja postoji u razvijenim zemlja- Ulaganja u izgradnju, rehabilitaciju, rekonstrukciju, izradu studija i projekata, u skladu je sa strateškim opredeljenjem Republike Srbije u sektoru drumskog transporta da se funkcio

nalno integriše u evropsku mrežu puteva. Važna aktivnost JP "Putevi Srbije", ogleda se u saobraćajnom i ekonomskom vrednovanju geografskog, međunarodnog i saobraćajnog položaja Srbije u okruženju. Naročito naglašavam, aktivno učešće u integrativnim procesima regiona Zapadriog Balkara, Jugoistočne Evrope Danavske regije. Vsamo je i uključivanje u sistem brzih saobraćajnica koje imaju evropski značaj, a koje su namenjene prvenstveno tranzitnom i turističkom saobraćaju. A tu je i lepr za usługa koje se podrazumevaju na Koridoru

Da li se može konstatovati da je izgradnja Koridora 11 i druge saobračajne infrastuk ture zamajac za celokupan privredni i dru štveni razvoj Srbije?

- Izgradnja Koridora I I i druge saobraćajne stukture zamajac je za celokupan privredni i draštveni razvoj Srbije. Kvalitetno i efikasno ravnomerno povezivanje privrednih područja, kao i pokrajina i regiona unutar Srbije, je imperativ. Poseban akcenat je na poboljšanja transportnih veza i otklanjanju uskih grla na mreżi puteva, izmedu manje razvijenih i razvijenijih privrednih područja. Unapredenje saoencajnih veza zmaći i efikasenje povezivanje Se bije sa okruženjem, pre svega sa susednim zemljama, povećanjem protoka i otklanjanjem uskih grla u pograničnim zonama.

Učešće u logradniji Kredova III., najbolj račin za stvorije referenci i dobijanje novih poslova <mark>i otan Orebov</mark>

PE ROADS OF SERBIA OPENS TOLL STATION COMPLEX "BELGRADE"

Complex of new toil station "Belgrade" was open for traffic on 13 April 2017.

New foll station "Belgrade" is located on E 75 motorway, section Belgrade - NE, with 23 entrance and exit lanes arranged in one row, 14 of which are foreigned for exit, i.e. payment, while 9 lanes are for entrance onto the motorway, 3 of which are reversible and can change their purpose in the periods of increased traffic volume, with which the capacity of payment lanes can increase from 14 to 17 lanes.

The number of traffic lanes equipped with the system for electronic toll collection has increased from the existing 9 to 20 traffic lanes.

Capacity of the new toll station "Belgrade" is about 5300 vehicles per hour, which is 45% higher than the capacity of the old toll station.

Parking lot for passenger vehicles (official parking lot), with 75 parking places, as well as parking lot for damaged vehicles with 17 parking places are located next to the traffic national.

Road maintenance depot is located eact of the traffic plateau, with the access from the direction of NIS, equipped with standard facilities: administrative building with garage for passenger vehicles and warehouse, with and salt storage and truck garage.

The administrative building for toll collection is located on the footbridge above the traffic lanes and tollbooths. Total length of the canopy facility is approximately 119,3 m and it is 20,04 m wide.

Three questions to Mr. Zoran Drobnjak, M.Sc.C.E., Director, Roads of Serbia

In this interview, IRF talks with the Diretor of the Public Enterprise "Roads of Serbia" about their plans for improving the quality of services provided to the road users through a series of new projects, rehabilitation and modernisation of the network as well a new toll collection system.

IRF: Mr. Zoran Drobnjak, what is the role Roads of Serbia plays in the country?

PE "Roads of Serbia" is successfully implementing the foreseen activities regarding maintenance, preservation, expropriation, development and management of the state roads and it is ready to achieve even better business results in the upcoming years.

With the modernization of our work we have provided modern management and maintenance of state roads thus increasing the level of traffic safety and upgrading the construction so that the road network of the Republic of Serbia is ready to become integral part of the European road network.

Construction, revitalization and renewal of traffic infrastructure with the implementation of strategic traffic development projects in our country are the precondition for intensified

industrial and social development of Serbia. Modern traffic infrastructure also valorises geostrategic position of Serbia generally and opens the way for our country towards the markets of the Southeast Europe and Asia.

Quality and efficient connection of the Republic of Serbia with the surroundings, primarily with the neighbouring countries, as well as its active role in integrative processes of the Western Balkans, Southeast Europe and the Danube Region are an imperative for us.

IRF: Could you tell us about objectives and priorities RoS has set for the short and long-term?

Based on the defined goals, the priorities set up for the short-term period, necessary to be implement are:

- Completion of the construction and modernization of routes along European corridors and sections of international highways passing through Serbia and /or Corridor X (E-75 and E-80) and E-763 (Belgrade - South Adriatic),
- Section 4, as the construction of the missing section on Corridor X section of Belgrade bypass from the tunnel "Straževica" to Bubanj Potok, and construction of the second highway lane from Ostružnica bridge to the tunnel 'Straževica" (Sections 4, 5 and 6);
- Construction of a new corridor and completion of works on corridors and sections on which construction has already begun, such as Route 4 (section Požega-Boljare),
- Route 5 (Pojate Prelijina) or the so-called "Morava Corridor" (a cross-road connecting the two most important corridors in Serbia).
- Route 9 (Novi Sad-Ruma or the so-called "Corridor across Fruška Gora" as well as continuation of the route Ruma-Šabac-Loznica,

- Route 4 (section Belgrade-Vršac (border with Romania)),
- Route 7 (Niš- Pristina),
- Motorways at the multimodal Corridor East: Corridor X Požarevac Majdanpek Negotin Bulgarian border Belgrade - Zrenjanin,
- Financing through various forms of public-private partnership and concession contracts should also be considered;
- Partial completion of the construction of the bypass around Belgrade (sections Bubanj Potok-Pančevo), Sombor, Zrenjanin, Kikinda, Irig, Kragujevac, Kruševac, Kraljevo, Valjevo, Užice, Niš and Novi Pazar and
- The construction of bypasses around Novi Sad, Vršac, Odžak, Sremski Karlovci, Prokuplje, Golubac, Majdanpek, Bor, Kladovo, Babušnica, Knjaževac and Osečina;
- Rehabilitation, modernization, upgrading and improvement of the existing network of state roads of I and II category;
- Improving the regional approach (high quality infrastructure highways are planned in a way that will not lead to the outflow of resources from less developed, peripheral areas);
- Construction of technical preconditions for the application of closed toll collection system (construction works on the creation of multilevel junctions/ interchanges, access roads and plateau of toll gates/ramps/lines).

IRF: Tell us about one recent project you have proudly engaged the company in.

The modernization of toll collection system in Serbia is one on which significant actions has already started and further action is foreseen in 2018.

Through the Sector for Toll Collection, the PE Roads of Serbia charges the road users on the following motorway sections:

- Belgrade-Niš, I A Category state road No. 1(E-75)
- Belgrade-Šid, (border with Croatia), I A Category state road No. 3(E-70)
- Belgrade-Subotica, (border with Hungary), I A Category state road No. 1(E-75) (opening sections Sirig-Subotica, 2017-
- Niš-Preševo, (border with Macedonia) I A Category state road No. 1(E-75) (opening new stations Preševo 2016-12-12).
- Ljig-Preljina, I A Category state road No. 2 (E-763) (opening two new stations Takovo and Preljina, 2017-01-01)
- Niš-Dimitrovgrad, (border with Bulgaria) I A Category state road No. 4 (E-80) (opening new stations Dimitrovgrad 2018-

On sections of motorways Belgrade-Niš, Belgrade-Šid and Belgrade-Subotica the toll is being collected within closed toll collection system, while on the sections, Niš-Preševo, Liig-Preljina and Niš -Dimitrovgrad the toll is being collected within open toll collection system. The toll is being collected on motorways in the length of 645 km by automated toll collection system. System covers 47 toll stations. Toll amount is calculated based on distance covered and vehicle class. Vehicles are classified according to their characteristics (i.e. number of axes, height of vehicle at first axis, total height and permissible

Modernization of toll collection system has been successfully implemented, so that out of overall 250 traffic lanes with toll collection and card distribution, 200 (80,0%) of lanes is provided with the system for electronic toll collection. The system is fully harmonized with the EU recommendations and standards for interoperability of electronic toll collection, thus allowing interconnection with huge part of electronic toll collection system installed in other European countries.

Flyers and leaflets for traffic management during works

У току су обимни радови на рехабилитацији аутопута Е-75 на проласку кроз град

Како бисте избегли велике саобраћајне гужве на проласку кроз Београд, молимо Вас да користите алтернативни путни правац – Обилазницу Београда, пратећи ознаку ТРАНЗИТ, према мапи која се налази на полеђини овог обавештења.

Срећан пут ЈП "Путеви Србије"

Dear Sirs.

Extensive works are in process now on rehabilitation of the section of E-75 highway

In order to avoid traffic jams passing through Belgrade, please use alternative route – Belgrade By-pass, following the TRANSIT mark, on the map overleaf.

Have a nice trip! JP "Putevi Srbije"

Sehr geehrte Fahrer,

Umfangreiche Arbeiten zur Ausbesserung der Autobahn E-75, die Strecke durch die Stadt Belgrad, werden gerade jetzt ausgeführt. Um die großen Verkehrsstauungen bei der Durchfahrt durch Belgrad zu vermeiden, bitten wir Sie die alternative Strecke – die Umleitung um Belgrad zu nutzen, wobei Sie der Bezeichnung TRANZIT folgen, und sich an die Mappe halten sollten, die sich auf der Rückseite dieser Mitteilung befindet.

Wir wünschen Ihnen eine Glückliche Reise! JP "Putevi Srbije"

Chers Voyageurs,

Sur l'autoroute E-75 les grands travaux de rénovation sont en cours sur le passage à

Pour éviter l'embouteillage important du trafic sur le passage à travers de Belgrade, nous vous remercions d'utiliser la voie de circulation alternative – le Détournement de Belgrade tout en suivant le signe TRANZIT, selon la carte figurant au verso de la

Bon voyage! JP "Putevi Srbije"

Sayın Yolcular,

Belgrad şehir içinden geçen otoban yolu E-75.

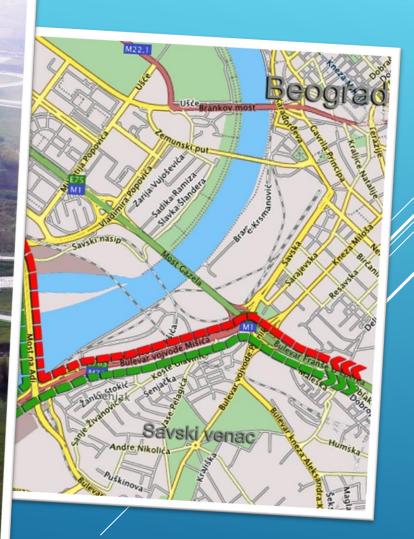

Bu haberi göz önüne alarak , Belgrad trafik sıkışıklığı nedeni üzerinden.

Alternatif seyahat rotasını lütfen seçiniz – TRANZİT Belgrad yolu, TRANZİT yazılı trafik

Bu ilanın arkasındaki haritayı takib edebilirsiniz.

İyi Yolculuklar! JP "Putevi Srbije"
