
The President

**43rd annual ASECAP Study and Information Days
Lisbon, 27-29 May 2015**

Dear participant, dear friend,

ASECAP and APCAP warmly welcome you to Lisbon, Portugal, and truly thank you for your participation in the 43rd annual ASECAP Study and Information Days. This year the very key challenge of "A Multimodal, Smart and Safe European Transport System: The Key Role of Motorways" will be thoroughly analyzed and discussed together by road transport experts, tolled road operators and European representatives.

The ASECAP Study and Information Days represent a unique opportunity to share the great experience and strong expertise that we all have, and ultimately to exchange our best practices. Therefore, I hope that you will participate actively in the debates on the 28th and 29th of May by exchanging your views with other delegates during the conference and various social events. You will also have the possibility to visit the exhibition area and find out about the key activities and projects of our important sponsors and exhibitors.

Finally, any suggestions, proposals or comments from your side regarding the organization of future ASECAP Study and Information Days are welcomed and they can be addressed to the ASECAP Secretariat (secretariat@asecap.com) where they will be duly taken into consideration.

Looking forward to a successful event.

Yours faithfully,

Øyvind Halleraker
